

**Master Class in Regulatory Intelligence: RI as a Strategic Imperative
Sunday, 10 September 2017**

****All attendees need to bring a fully charged laptop to the workshop. Limited power is available.***

This interactive workshop will examine the fundamentals of global regulatory intelligence (RI), including what it is and isn't, how it is conducted, the strategic value it brings to key partners and how it is imperative to regulatory decision making throughout a development program and lifecycle management of a therapeutic product. Discussion and hands-on exercises will provide insights on the collection, analysis, communication, and management of regulatory intelligence, with an emphasis on translating RI into a competitive advantage. The workshop will cover prescription drugs, biologics and medical devices with a focus on the US, EU and Canada.

Facilitators:

Kimberly Belsky, senior director, regulatory policy and intelligence, Mallinckrodt Pharmaceuticals

Linda Bowen, senior director, regulatory science and policy, Sanofi

João Duarte, associate director, Europe regulatory policy and intelligence, Takeda

Robert Kester, associate director, regulatory affairs international, Merck

Matt Medlin, manager US regulatory affairs R&D Pipeline, Chiesi

James Monroe, director, regulatory affairs, Pentax Medical
